SUMMARY

Experienced Frontend Developer with 3.4+ years of experience building scalable and dynamic web applications using React.js, JavaScript, Redux Toolkit, Tailwind CSS, HTML, CSS, and Bootstrap. Skilled in developing responsive, high-performance, and user-friendly interfaces following modern frontend best practices. Experienced in delivering enterprise ad creatives and automation platforms. Strong expertise in component-based architecture, state management, and performance optimization.

EXPERIENCE

Software Development Engineer **Bangalore**

Ninestars Information Technologies Pvt Ltd, Bangalore 10/2022 - Present

- Developed and maintained user-facing features for multiple websites using **React.js** and related libraries.
- Collaborated with designers and back-end developers to implement front-end solutions that met both technical and aesthetic requirements.
- Built responsive and modern UI components using React JS, **HTML, CSS, JavaScript, Bootstrap, GSAP, React-konva and Tailwind CSS**, ensuring cross-browser compatibility.
- Implemented state management solutions using **Redux and Redux Toolkit** to efficiently manage application state and improve scalability.
- Integrated and managed asynchronous data flows using **Redux Toolkit middleware** for optimized API handling.
- Implemented and integrated RESTful APIs to connect front-end applications with back-end services, ensuring seamless data exchange and real-time updates.
- Optimized web applications for maximum speed and scalability, delivering exceptional user experience across various devices and browsers.
- Worked closely with QA teams to identify, troubleshoot, and resolve bugs and performance issues in a timely manner.
- Acquired strong proficiency in modern front-end technologies and best practices, including component-based architecture and reusable UI patterns.
- Worked on developing animated ad banners for global clients such as **Adobe, Microsoft, and Audible**, ensuring brand consistency, performance optimization, and cross-platform compatibility.
- Led the development of animated and static ad banners for clients, ensuring strict adherence to brand guidelines, campaign briefs, and delivery timelines.

ACHEIVEMENTS

Star of the month

Recognized for outstanding performance in developing websites using React.js, demonstrating dedication and excellence in delivering high-quality projects.

Spot Award

Received recognition for completing the entire website, including all API integrations, within a tight deadline of three weeks.

PROJECTS

Enterprise Animated Digital Ad Campaigns

- Developed high-performance animated ad banners for enterprise clients such as Adobe, Microsoft, and Audible using HTML5, CSS3, JavaScript, GSAP, ensuring brand compliance and engaging user interactions.

Ad Creatives Automation Platform

- Developed a creative automation platform using **React.js, Redux Toolkit, Tailwind CSS, React-Konva, and REST APIs** to dynamically generate static and animated ad banners based on campaign briefs, brand guidelines, and master templates.

Developed a creative automation platform using **React.js, Redux Toolkit, Tailwind CSS, React-Konva, and REST APIs** to dynamically generate static and animated ad banners based on campaign briefs, brand guidelines, and master templates.

- Implemented canvas-based dynamic rendering and automated animation sequencing using **React-Konva and JavaScript**, enabling real-time preview, multi-size adaptations, and significantly reducing manual creative production time.
- Designed an end-to-end role-based workflow allowing **Designers** to create creatives, automated and manual QC validation for compliance checks, and final approval/export by the **Project Manager (PM)**, ensuring streamlined campaign execution and quality assurance.

AOTMOCR, AOTMEDGE

- The AOTMOCR and AOTMEDGE projects focus on developing an Optical Character Recognition (OCR) system. OCR technology is used to convert different types of documents such as scanned paper documents, PDFs, or images taken by a digital camera into editable and searchable data.
- Developed and maintained a user-friendly interface for the entire website, ensuring an intuitive and responsive design across all devices.
- Developed an interactive canvas for Optical Character Recognition (OCR) tasks using React-Konva, enabling precise graphical operations and annotations.

Infilter, Divo

- Infilter provides comprehensive analytics and insights for YouTube and Instagram channels, empowering brands and creators to optimize their strategies. Utilizing tools such as React JS, Bootstrap, and related libraries, the platform offers detailed reports on channel performance, audience demographics, content analysis, and trend forecasting.
- I implemented intuitive and visually appealing frontend components using technologies such as popular frontend frameworks like React.js implemented all APIs necessary for the project, ensuring seamless integration and functionality. Acquired proficiency in front-end technologies such as HTML, CSS, and JavaScript.

Bretty

- Bretty is a web application where users can engage in conversations with various AI models such as ChatGPT, Gemini, and Claude and etc. Developed with React Js and related libraries, the platform enables users to generate images by querying the AI models and retrieve data through image uploads. This project enhances and explores image processing.
- Functioned as a Web Developer, contributing significantly to the entire website's development.

Vel Aero DX

- VEL highlights drone technology's benefits and applications in agriculture. Through intuitive interfaces and dynamic content presentation, the site educates farmers on drone features and their potential in optimizing crop management, pest control, and yield monitoring.

SKILLS

React.js:

- Experience in developing reusable UI components using **functional and class components**.
- Strong understanding of **React Hooks** including useState, useEffect, useContext, useMemo, and useCallback.
- Proficiency in **state management using Context API, Redux, and Redux Toolkit** for scalable application architecture.
- Experience in integrating **REST APIs using Fetch, Axios**, and handling asynchronous data efficiently.
- Experience with **React Router** for dynamic routing, nested routes, route parameters, and programmatic navigation.
- Applied performance optimization techniques such as **code splitting, lazy loading, PureComponent, and memoization**.

Redux & Redux Toolkit:

- Experience in implementing centralized state management using **Redux and Redux Toolkit**.
- Proficient in configuring **Redux Store, Slices, Reducers, and Actions** using Redux Toolkit.
- Integrated Redux with React applications to manage complex state and improve performance.

JavaScript:

- Strong proficiency in **core JavaScript (ES6+)** concepts including variables, data types, functions, loops, and conditionals.
- Experience handling asynchronous operations using **Promises, async/await, and callbacks**.
- Proficient in modern JavaScript features such as **arrow functions, destructuring, spread/rest operators, and template literals**.
- Experience manipulating the **DOM**, handling events, and building interactive UI functionality.
- Implemented robust **error handling using try...catch and custom error handling techniques**.
- Experience working with **Browser APIs** such as LocalStorage, SessionStorage, and Fetch API.

Tailwind CSS, HTML, CSS, Bootstrap:

- Proficient in building responsive UI using **Tailwind CSS, HTML5, CSS3, and Bootstrap**.
- Experience using **Tailwind CSS utility classes** to create modern, scalable, and responsive layouts.
- Strong understanding of **responsive design, Flexbox, Grid, and mobile-first development**.
- Experience implementing **CSS animations, transitions, and interactive UI components**.
- Ensured cross-browser compatibility and consistent UI across different devices and screen sizes.
- Integrated frontend components with JavaScript and React for dynamic functionality.
